-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Response to Arguments

1. Applicant's arguments with respect to claims 2-12 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 5,7-18, are rejected under 35 U.S.C. 102(b) as being anticipated by Titus '542.

Considering claim 5, Titus discloses a fluid metering method comprising a) a counter (see col 2, lines 34-36); b) an electro-valve operatively connected to the counter, electro-valve capable of being opened and closed (see col 2, lines 29-33); c) a connection socket the electro-valve configured to control the fluid flow through the connection socket (col 3, lines 51-59 and col 8, lines 51-59); d) a control card operatively connected to the counter, the control card is configured to remotely open and close the electro-valve (see col 3, lines 28-37, col 8, lines 2-10 and col 9, lines 60-67).

Art Unit: 2635

Considering claim 7, Titus discloses the limitation of this claim see fig 3, item 34.

Considering claims 8,9 Titus discloses the limitations of these claims see col 11, lines 3-12.

Considering claim 10, Titus discloses a) a computer (see col 8, lines 23-32); b) a first communication adapter (see col 4, lines 26-63 and col 11, lines 3-12); c) a second communication adapter (see col 8, lines 7-14); d) a communication system (see col 11, lines 12-22).

Considering claim 11, Titus discloses the limitation of this claim see col 4, lines 47-58 and col 8, lines 10-14.

Considering claim 12, Titus discloses the limitation of this claim see fig 9, telephone line.

Considering claim 13, the limitations of this claim are interpreted and rejected as stated in claims 1 and 10; the limitation the controller is operatively controlled remotely and a central data system capable of receiving counter information and remotely controlling the opening and closing of the electro-valve (see col 9, lines 57-62).

Art Unit: 2635

Considering claims 14,15 Titus discloses the limitations of these claims see fig 3, items 54 and 122.

Considering claim 16, Titus discloses the limitation of this claim see col 9, lines 57-62.

Considering claim 17, Titus discloses the limitation of this claim see col 8, line 60 to col 9, line 1.

Considering claim 18, the limitations of this claim are interpreted and rejected as stated in claim 16.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 6, is rejected under 35 U.S.C. 103(a) as being unpatentable over Titus '542.

Considering claim 6, examiner interprets the counter to be a meter. One of ordinary skill in the art readily recognizes fluid meters may be digital or analog. Therefore, it would have been obvious to one of ordinary skill in the art to incorporate a digital meter in the

Art Unit: 2635

Titus system because Titus is concern with the monitoring of a fluid commodity to a user.

Conclusion

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
